

# Pharmaceutical Isolators and Containment Systems

With 50 years of experience in designing and manufacturing industrial containment products and systems, Lancs Industries develops customized solutions for the unique requirements of your pharmaceutical manufacturing organization.

We offer a full range of containment options including flexible isolators, machinery and equipment enclosures, transfer bags and systems, container liners, charge bags, and related ingredient containment supplies essential to manufacturing complex pharmaceutical formulations.

These containment systems create controlled environments that protect your personnel from exposure to hazardous chemicals and compounds, high-risk pathogens and other substances while ensuring optimal conditions for your critical production processes. Our containments are made to provide the highest level of safety while ensuring workflow efficiency.

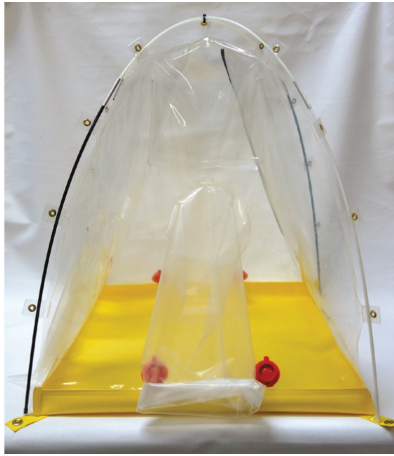

*Lancs flexible isolators and containment systems are used for:*

- Sampling
- Granulation
- Sieving
- Milling
- Blending
- Mixing/active addition
- Compressing
- Powder transfer
- Drying
- Coating
- Tablet pressing
- Dispensing
- Loading
- Processing

# Pharmaceutical Isolators and Containment Systems

At Lancs we work side-by-side with you to develop customized solutions for your basic or most challenging projects.

Our custom design and manufacturing expertise delivers your products in the precise material, size, shape, and functionality your situation requires. And every Lancs containment is thoroughly inspected and air-tested to ensure you receive the safest, most reliable containment product every time.

## *Design and Build a Customized Containment System for Your Unique Production Needs*

*Our customers use these systems for:*

- Pharmaceutical research
- Bulk drug manufacturing
- Drug preparation
- Sterile compounding
- Product packaging
- Laboratory waste handling
- Equipment protection, cleaning and maintenance
- Pilot plant scale-up

Lancs flexible isolators can be constructed using high-tension flexible non-static materials that permit operation at negative pressure, preventing APIs from escaping the containment area.

To discuss your pharmaceutical containment requirements, please contact your Lancs Industries representative at 505.738.7200
